REASONS FOR ALLOWANCE

Claims 1-6 have been allowed over the prior art.

The following is an examiner's statement of reasons for allowance: Prior art could not be located that taught forming a hybrid frame by placing the frame in an injection molding die, wherein the electrical connecting surfaces of a leadframe are held down by a stamp during a part of the injection molding in order to compensate for surface defects. This limitation, in conjunction with the other claim limitations, was neither disclosed in, nor suggested by, the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Baird et al., US Patent 5,118,271, teaches encapsulating a die wherein the mold halves clamp onto the leads of a lead frame in order to maintain cavity dimensions (2, 16+).

Moyer, US Patent 4,504,427, teaches injection molding of a lead frame wherein spacer bars are punched out with a die stamp after the molding process is complete.

The rest of the documents cited were listed in an international search report but not put on a PTO-1449.
